Dear Dr. Basu,

Thank you for your patience while we evaluated SCIENCEDOMAIN's journals. I'm pleased to inform you that the following journals have been found suitable for inclusion in the CAS databases. We will begin coverage with volume 1, issue 1 for all titles. We will routinely check the websites and put the new issues into our production system.

American Chemical Science Journal	2249-0205
American Journal of Experimental Agriculture	2231-0606
Annual Review & Research in Biology	2231-4776
British Biotechnology Journal	2231-2927
British Journal of Applied Science & Technology	2231-0843
British Journal of Environment and Climate Change	2231-4784
British Journal of Pharmaceutical Research	2231-2919
British Microbiology Research Journal	2231-0886
European Journal of Food Research & Review	2231-0878
European Journal of Medicinal Plants	2231-0894
International Journal of Biochemistry Research & Review	2231-086X
International Research Journal of Pure and Applied Chemistry	2231-3443
Physical Review & Research International	2231-1815

Thank you for contacting us about the following four journals. Although they appear to be excellent journals, our chemists did not feel that there was enough chemistry-related material in the journals for inclusion in the CAS databases.

British Journal of Medicine and Medical Research	ISSN 2231-0614
British Journal of Mathematics & Computer Science	ISSN 2231-0851
American Journal of TROPICAL MEDICINE & Public Health	ISSN 2248-986X
British Journal of Management & Economics	ISSN 2249-4413

Please note that we have added CAS' mission statement to the attached copy of SCIENCEDOMAIN's Terms & Conditions. The statement reads as follows:

· The ongoing mission of Chemical Abstracts Service (“CAS”), a division of the American Chemical Society, is to advance the chemistry enterprise in part by making scientific information discoverable. To this end, CAS abstracts and indexes scientific journal articles. Resulting data is included in CAS products and services, which are made available to scientists and information professionals. CAS will continue to abstract and index scientific literature to fulfill its mission.

If you have questions or concerns about the addition of our mission statement to the Terms & Conditions, please contact me.

Best regards,

Bobbi
